"Every form correctly seen is beautiful. The eye doesn't see any shapes, it sees only what is differentiated through light and dark or through colors.: Goethe.

The Metz flash system is one that I count on extensively. From Stone Town, Zanzibar to the Island of Cleopatra to the beautiful babes (models) in Paris, the Metz Light: Is Translucent, Transparent, Sharp, Slick, Edgy, Hot, Tall, Defined, Compact, Sexy, Beautiful, Eccentric; and allows me to indulge in the juxtaposed cataclysm of images that float my space - the photographer's magic - the ability to stir the soul with light and shape and color. The light dances the soul if you do it right. It is my absolute favorite. Style, Sense, Motion. In Zanzibar we still fly on carpets..."

54 AF-1

The Metz 54 AF-1 Digital is a fully dedicated flash unit with an abundance of features and terrific value. The 54 AF-1 is compatible with all of today's in-camera metering systems including E-TTL II and i-TTL. Packing a powerful light source into the 54 AF-1 offers high-precision light output in a compact design. Auto zoom reflector (24-105 mm), fast recycling, modeling light, three partial light output levels, and second curtain synchronization are just a few of the features that make the 54 AF-1 Digital a perfect companion to your camera.

54 MZ-4i

The 54 MZ-4 is the flagship model in the Metz shoe mount series, offering cutting-edge technology in a feature laden flash unit. The 54 MZ-4 has a secondary fill-in reflector; a power zoom reflector (24 mm - 105 mm), dual AF measuring beams and the SCA 3002 adapter system. A 12 stop, built-in Auto Mode Sensor guarantees total control and even illumination. Additional modes include manual, stroboscopic, and of course, is compatible with today's digital E-TTL II and i-TTL metering systems. Full tilt and swivel head. Guide Number 177.

45 CL Series (or 45 Digital)

The 45 CL Series handle-mount flash units have earned a well deserved reputation for reliability and service. These versatile and powerful strobes have been used in a variety of photographic applications such as sports events, photojournalism, weddings and travel photography. When flexibility and power are needed for the job, the 45 CL Series flashes are the workhorses of the industry. The 45 CL Series have an impressive guide number of 148 (ISO 100 at 35mm) and built-in automatic thyristor circuitry. The 45 CL Series provides automatic exposures with

70 MZ-5 (or 76 MZ)

The Metz 70 MZ-5 is the culmination of years of technology and expertise in flash innovation. Combining sophisticated flash features with impressive power output, the 70 MZ-5 challenges a new frontier of photographic possibilities. The 70 MZ-5 is packed with all the necessary features and functions to qualify as the most versatile and unique flash unit in the industry. With an impressive maximum Guide Number of 230, the 70 MZ-5 is the ideal solution to any shooting assignment. Consisting of handle-mount and separate controller linked together, they provide unparalleled
